

BODY PIERCING AFTER-CARE INSTRUCTIONS

PLEASE FOLLOW THESE AFTERCARE INSTRUCTIONS:

- please cleanse the pierced area by using antibacterial or antimicrobial soap for the external skin and/or antiseptic or carbamide peroxide mouthwash for the oral cavity;
- for at least the first two to six weeks minimize exposure to the sun, and discourage swimming in fresh, salt, or chlorinated water;
- use sterile bandages or other sterile dressing when necessary;
- the client shall consult a health care practitioner at the first sign of infection or allergic reaction, and report any diagnosed infection, allergic reaction, or adverse reaction resulting from the body piercing to the artist and to the Texas Department of Health, Drugs and Medical Devices Division at 1-888-839-6676.

TONGUE

- rinse with listerine each time after eating, drinking, or smoking until healed (2-4 weeks)
- rinsing with one teaspoon of sea salt dissolved in two ounces warm water at least twice per day will aid healing
- eating ice for the first two days will aid pain and swelling
- do not drink beer for at least the first week, as this will cause excessive swelling
- keep oral contact to a minimum for at least one week
- minimize exposure to filth
